PRODUITS OU MACHINES

The business scope of SNEIA: information and technology exchanges, technical advice, projects application, quality appraisal, marketing services, education and training and exhibition affairs. Functions of SNEIA:

SNEIA has an expert team in new energy to assist the government and the industry in making industrial standards and providing technology consultation.

SNEIA cooperates with international institutions, detection and identification agencies and industry associations in a way to provide the member units with one-stop services of detection, identification, international investigation, exchanges and cooperation, etc.

SNEIA offers its members technological market services: a. the certification of Shanghai high and new tech results transformation projects; b. the management of West China projects, the assistance in helping medium and small-sized enterprises apply governmental funds such as the Innovation Foundation for Innovative Medium and Small-sized Enterprises and the technology management for serial projects; c. assessing intermediate and senior technical title; d. the technology training and so on.

SNEIA works for issuing products information, keeping and selling techniques, standardizing this industry, helping its private enterprise members in reviewing, applying and approving the intermediate and senior technical titles. □ SNEIA is capable of organizing large international exhibitions, technical and academic exchanges. On January 1 2007, Shanghai New Energy Net was opened, and the industrial journal Shanghai New Energy was also issued, which helps drive the development of new energy industry in different ways.
