PRODUITS OU MACHINES

High purity Iridium
Products

FURUYA METAL's production of Iridium products start from the preparation of high purity base material produced by our unique process Double Plasma Melting Process. This enables us to fabricate this very hard material to almost any shapes, such as crucible, pipe, rod, wire, etc. We can produce maximum 50kg ingot (World biggest).

Reinforced Platinum Products

FURUYA METAL provides glass melting equipments, mainly for LCD and optical glass use, to glass manufacturers all over the world.
