

Company Overview

boraident® GmbH

Company

boraident GmbH is a medium-sized company with its head office in Halle (Saale) in the federal state Saxony-Anhalt in Germany.

We develop and distribute innovative products in the fields on laser marking, identification, glass sensors, and software-based integration into an automated production line. Worldwide singular are our laser marking technologies UniColor®, MarcColor® and MarcColor® Reflection which enable to generate an aesthetic, indestructible and forgery-proof marking on and inside the glass material without any destruction of the glass substrate.

System Supplier

boraident is unique in its marking and identification systems from one source, which guarantees maximum process stability for your production line. As specialists for Marking and Identification Systems for transparent media we stand for extensive consulting service to find the equipment out of our range of products that best meets your requirements.

The integration of our Marking, Identification, and Sensor Systems into fully or partially automated production lines is possible as a system or an OEM solution.

boraident international

We trade our products worldwide. Next to our headquarters in Germany, representations and service points are established in China, Litunia, Great Britain, India, Korea, Taiwan, Spain, Portugal and USA.
