

GLASS PROCESSING IS OUR PASSION
SERVICE

The Benteler Group is an internationally active company with its business divisions Benteler Automotive, Benteler Steel/Tube and Benteler Distribution.

The company was founded 1876 and is still in family ownership today. Since than four generations have since contributed to shaping the Group, which now ranks among one of the largest industrial enterprises in Germany.

Operating under the Benteler name, the business is not only one of the 100 largest independent automotive suppliers, but also one of the most important steel tube manufacturers in Europe. In addition, Benteler is one of the leading stock holders and processors of steel tubes and stainless steel tubes.

Today, Benteler employs about 25.850 people at 170 locations in 38 countries.

Continuity and progress – for more than 130 years

“Progress is our tradition” – our corporate motto says a lot about how we understand our work in the world. We are a family enterprise in the best sense of the word. This translates into decisive advantages for our customers: short chains of command, a high degree of individual responsibility, continuity and the willingness to venture into new territory as a partner to our customers.

“Benteler” stands for technical expertise, reliability, high-quality products and highly competent consulting. Responsible thinking and acting is our top priority. Therefore we see it as a matter of course to offer our customers an extensive range of services.

Your Equipment in the best of hands

The Benteler service is a synonym for comprehensive technical competence and reliable support. We ensure a high availability and we react quickly and flexibly. Our technicians will be pleased to inform you about service solutions tailored to your particular needs, in order to avoid problems before they arise.

Due to our distinctive process know-how and our long-term experience, we are a competent partner for the technical service of your equipment. Ranging from machine maintenance, through relocation of machinery and remote service, to our spare parts service and telephone support: we offer the complete service from one source.

Preventive servicing

Improve the performance of your machine by having it checked regularly by trained specialist technicians. Our experts will establish a check list for regular checks of all components and replacement of worn parts. Preventive servicing will reduce probability of unexpected failures and allows scheduling necessary repairs. With our service, you can be sure of the perfect technical condition of your equipment.

Service contracts

Service contracts are the best prevention. They ensure optimum machine performance and prevent unnecessary downtime. A service contract allows you to safeguard the reliability and operational readiness of your equipment in the most cost-effective way.

Overhauling of machinery

Overhauling your equipment may be a cost-saving alternative to new acquisitions of machinery and equipment.

- Preventive servicing
- Machine maintenance
- Service contracts
- Relocation of machinery
- Machine repair
- Overhauling of machinery
- Telephone support

Before overhauling

After overhauling

We keep up with the latest trends for your benefit

Persisting in global competition needs machinery convincing in technology and performance. In order to improve the process chain in your plant in a lasting way, we can analyse your equipment and your production processes, followed by suggesting optimisation potentials to you.

- Equipment optimisation
- Modernization
- Process technology

We enable our customers to increase their productivity and to optimise their processes. We will show you the full potential of your equipment.

Equipment optimisation

Make us bring your equipment up to the latest state of the art. We keep up with the latest trends and will make sure that your equipment will be able to persist in growing competition. An efficient equipment upgrade is a worthwhile investment.

Modernization

Competition makes requirements increase continually; many machines well advanced in years are no longer up to the state of the art. By well-directed modernization, the Benteler service team will bring your equipment to the top of technological progress. We will competently improve your productivity, individually adjusted to your production processes.

» Performance needs passion. We know where to position the lever! «
