HISTOIRE DE L'ENTREPRISE

One of the world's leading refractory materials and services providers recently announced the decision to rebrand itself under the new name of HarbisonWalker International. The decision was made following an exhaustive market research and branding initiative in which one of the company's legacy brands, Harbison-Walker, returned the highest awareness and positive customer perception of all of the company's brands, as well as, the brands of the company's refractory competitors. The former ANH Family of Companies including A.P. Green Refractories Company, North American Refractories Company, and Harbison-Walker Refractories Company, is known as a knowledgeable leader in the manufacture and supply of innovative refractory products for a wide range of industry applications presenting, among other things, challenging heat-intensive or chemically corrosive production environments.

Building on this strong heritage, the new HarbisonWalker International is positioning itself as the first and only choice for comprehensive solutions to address the needs of its growing international customer base. It also hopes to

reinvigorate the strong bond between the company and both its employees and its customers.

Headquartered in Pittsburgh, Pennsylvania, HarbisonWalker International has a network of 18 manufacturing facilities and 30 distribution centers to serve markets across North America, manufacturing facilities in the U.K., Indonesia, and Mexico, as well as, a lab/testing facility located in China. Industries served include cement & lime, energy, chemicals, non-ferrous metals, glass, iron & steel, aluminum, copper, hydrocarbon and minerals processing and environmental technology industries.

Company Profile of **HarbisonWalker International**
