Adresse	STG Combustion Control GmbH & Co KG Kiekebuscher Weg 14 03050 Cottbus
Pays	Allemagne
Téléphone	0049 355 590200
Télécopie	0049 355 541124
Internet	www.stg-cottbus.de
Employées	50
Certificats	SIEMENS Solution Partner, SIEMENS Industry Partner Glass
Année de fondation	1990
Associations	HVG, DGG

CORRESPONDANTS

Contact 1. M. Dr.-Ing. Peter Hemmann
Manager
Phone: 0049 355 590200
Fax: 0049 355 541124

PRODUITS OU MACHINES

Supplier for Heat technology, Sensors, Process control and process optimisation for industrial furnaces:

Hot End Process Control Systems
DeNOx-Technology consisting of :
 - Oxygen probes and Lambda control
 - DeNOx Natural Gas and Heavy Oil burners
 - Optical Melting Control
 - Technology for optimisation of combustion air distribution (Air Curtain System)
 Strategies for rational use of energy
 Thermotechnical analyses
 Furnace pressure measurements
 Air volume measurement of combustion air
 optical cable assembly
 In preparation: Supply of thermo elements

HISTOIRE DE L'ENTREPRISE

Three chemical engineers, who have known each other since college, have founded STG Cottbus in early 1990 in Cottbus, Germany. With January 01, 2012, almost 22 years after foundation of legal form as GmbH, STG has restructured: New company "STG Combustion Control GmbH & Co KG" takes over the businesses of GmbH and will be your partner for the future.

As an innovative and technology-oriented engineering company STG now has a staff of more than 50 engineers and employees developing solutions for

- energy savings and NOx-reduction
- progressive burners
- sensor technology
- innovative automation and process control systems

not only in Germany but in more than 30 European and overseas countries.

Traditionally STG finds its customers mainly in glass industry, but also in ceramic and metallurgic production.

Scope of supply and services:

- Furnace Process Control

CAD-Planning
Assembling of electrical cabinets
Field installation
Programming of DCS
Visualisation
Installation and Start up of Hard-and Software
Training and instruction of customer's staff (either on site or at STG)

- Solutions for heat and burner technology for furnace and downstream systems

DeNOx Technology consisting of following components:

Oxygen probes and Lambda control
DeNOx Natural Gas and Heavy Oil burners
Optical Melting Control
Technology for optimisation of combustion air distribution (Air Curtain System)

- Measurement instrumentation for high temperature range

Oxygen probes and Lambda control

- Environmental engineering in order to reduce, better to avoid noxious emissions resulting from high temperature processes within the glass industry

Strategies for rational use of energy
Thermotechnical analyses

Company Profile of STG Combustion Control GmbH & Co KG
