PRODUITS OU MACHINES

We are acting in many areas of the glass industry like packaging glass, fiber glass, container glass, flat glass, glass wool and household glass. In these industries we are competent for melting furnaces, feeder and especially for special applications.

Some examples of our product range:

- Engineering and modelling for boosting systems
- Water-Cooling systems for electrode holders
- Electrode holder for bottom / side / top
- Power regulation / transformers
- Service in hot-drilling and change of electrode holders

HISTOIRE DE L'ENTREPRISE

BOCK ENERGIECHNIK

was founded in 1984 by graduate engineer Werner Bock.

Since 2016, Mr. Günther Bock, son of the founder, together with the support of his wife Diana, manages the company.

AREAS OF ACTIVITY

The objective of the company is the efficient utilization of electric energy in the glass industry.

We design, manufacture and install electrical heating systems for a variety of applications in the glass industry. Forty years of experience in the area is helpful. We have made many installations to the complete satisfaction of our clients.

Electrical heating systems for the glass industry.

- Physical and mathematical modelling with representation of the electric power density in molten glass
- Electric additional heating systems (boosting facilities), complete installations from planning to commissioning
- Transformers and thyristors with corresponding adjustment controls
- Electrode supports with accessory installation equipment for bottom-, side- and top electrodes
- Cooling equipment for electrodes
- Forehearth heating
- Feeder bowl (spout) heating
- Glass level measurement with established principle - in high-tech measurement processes
- Special furnaces – according to customer specifications
- Service in hot-drilling and change of electrode holders

Company Profile of **Bock Energietechnik GmbH**

A service of glasssglobal.com, an affiliate of glasssglobal group.
