PRODUITS OU MACHINES

Neptun is in the market of glass processing machines with manufacturing solutions that have been reviewed in terms of performances, reliability, quality and with patented process innovations that are unique at international level.

Horizontal "Tornado", as well as vertical "LV Top" and "Superinox" washing machines, all available in different versions, are reliable and simple to use, thoroughly designed and conceived for the businesses that need effective machines from washing and drying points of view.

Vertical "Promax" machining centres for bevelling and grinding operations, and "Drillmax" machining centres for drilling and cutting operations: they are flexible machines, which are characterised by comprehensive functionalities, high performances and high technology content.

"Rock" is the new straight grinder: it is available in the versions with 8 and 11 grinding wheels, with low cost of ownership and equipped with an innovatory numerical control system. It is particularly suitable for the businesses that need quality, strength and long duration of mechanical components.

The straight grinders that belong to the Rock range, thanks to the innovatory patented "Edge to Shape" solution, can grind the edges by controlling the final dimension of the plates, also in terms of squaring.

Rock, equipped with the ETS fitting-out, goes beyond the concept of conventional machine and evolves to become a numerical control machine in all respects, thus becoming a good alternative for the processing operations that, up to the present day, could only be carried out by two-way or CNC machining centres.

Company Profile of **Neptun S.r.l.**

A service of glasssglobal.com, an affiliate of glasssglobal group.
