PRODUITS OU MACHINES

Market

Performance Products' growth is led by its ability to innovate and its spending on research and development.

Strategy

Performance Products is a top-tier producer for several of its product lines, including polyamides, PVDF, molecular sieves and organic peroxides. Its primary goals are excellent customer relations and the ability to offer innovative solutions, create new, high-value-added products and tap the potential of regional growth markets.

Main Brands

Rilsan® High Performance Polyamides: anti-corrosion coating, brake circuits, pipes, automotive fuels
Luperox® Organic Peroxides: a polymerization agent used in the design of gaskets, hoses, packaging plastic
Pebax® Polyether Block Amides: athletic shoes, toy manufacturing, watchmaking, automobiles
Kynar® Fluoropolymers: protective coating for the construction industry, chemical engineering and petrochemical equipment
Evatane® Functional Polyolefins

Siliporite® Molecular Sieves

HISTOIRE DE L'ENTREPRISE

King of Prussia, PA is Arkema's US headquarters and main research and development location. In June 2011, we moved our business center/corporate offices from downtown Philadelphia to co-locate with our research and development campus to the west, though the site remains strongly involved in research and development activities.

Innovation is the hallmark of Arkema Inc. researchers and scientists. We develop state-of-the art specialty chemicals and polymers that provide customers with practical solutions to the challenges and opportunities they face. As a company, Arkema is committed to developing solutions today for tomorrow's societal needs. We have established four priorities for our research and development focus:

- Water management
- Lightweight materials
- Materials for new energies
- Renewable materials

Arkema is committed to excellence, the pursuit of safety and environmental protection, optimized performance, and best-in-class competitiveness.
