PRODUITS OU MACHINES

Focusing on two principal market segments - the spectral-analytical market and the laser market - SOLAR TII is a supplier of cost-effective compact Monochromators, Spectrographs and Spectrometers to analyze emission from the UV to the IR, Solid-State Tunable Ti:Sapphire Lasers with a super-narrow output linewidth, Optical Parametric Oscillators with automated wavelength tuning, Laser-Induced Breakdown Spectroscopy Analyzers, Confocal Sub-micron Scanning Fluorescence & Raman Microscopes.

In the spectral-analytical market, SOLAR TII solutions aim at a variety of scientific and industrial applications that include UV to IR Measurements, Emission, Fluorescence and Raman Spectroscopy, Absorption and Transmission, Multichannel Spectroscopy, Express-Analysis of qualitative and quantitative element composition of solid and liquid samples.

SOLAR TII tunable and solid-state UV lasers go beyond the physical limits of conventional designs to offer new possibilities in science and industry.

The instruments feature high quality, stability, efficiency and reliability.

SOLAR TII annually invests an essential part of the revenues in research and development, and continues to explore a number of new application areas.

For the time being, a great many of our products have been delivered to customers from Europe, Asia, the USA and, primarily, from Japan. The company works closely with the customers, providing innovative, cost-effective products to set new performance standards.

The quality of the materials and high standards of production ensure customers on time delivery of the most reliable products.

Located in Minsk (Belarus), SOLAR TII sales products, gives service and product support directly and through the authorized international distributors.

Company Profile of **SOLAR TII, Ltd.**

A service of glasssglobal.com, an affiliate of glasssglobal group.
