PRODUITS OU MACHINES

Solvent-based screen-printing inks

8600 ink series

Good pot life of the ink and hardener mixture, excellent gloss, excellent surface tension, high stability of ink in the screen, avoid color separation on pastel shades, high pigment concentration, yellow and red colors are resistant to high temperatures (150 °C). When perfectly cured this ink has excellent resistance to many products.

Solvent-based pad printing inks

MG-Pad ink series

Two-component pad printing ink for industrial glass and metal applications. This pad printing ink is characterized by excellent hardness, excellent mechanical and chemical resistance.

UV screen-printing inks

Polyglass ink series

UV high gloss two component ink for printing on glass and ceramics. Suitable for a variety of applications: bottles (frosted glass and raw glass), some pre-treated or not pre-treated cosmetic containers, drinking glasses, glass for interior use, furniture, mirrors, slot machines, automobile, glassware (vases, candle holders, ashtrays, etc.).

UV LED screen-printing ink

UVHDDGlass ink series

UV LED high gloss two component ink for printing on glass and ceramics. Suitable for a variety of applications: bottles (frosted glass and raw glass), some pre-treated or not pre-treated cosmetic containers, drinking glasses, glass for interior use, furniture, mirrors, slot machines, automobile, glassware (vases, candle holders, ashtrays etc.).

UVHDDGlass is non-CMR.

UV digital inkjet inks

Evojet 1700 ink series

For treated glass with a primer (Evoprime)

Evojet 3100 ink series

Can be printed on glass without the use of a primer and without post curing.

Encres DUBUIT offers more solutions with Spray or Masking inks, specialty inks.
