## PRODUITS OU MACHINES

### DCS Solutions

Our aim is to provide you with the right solution for your application as part of a complete service to minimize your costs and maximize your return on investment. Quality, efficiency and high availability are critical to the glass manufacturing process and our team of experts will work with you to ensure

you get what you need.

EurothermSuite provides you with a scalable software solution that has been implemented by glass companies worldwide. Its easy and intuitive functionality provides all the aspects of a your required system, including required networks and interface to Eurotherm and 3rd party instruments, as required by you.

#### **Power Controllers**

A complete range of products to control your power requirements - designed to work securely and save you energy across your glass plant. From 50A to 1600A, models are available to take AC and DC logic signals and well as analogue inputs.

#### **Electric Motor Control**

Throughout the glass industry electrical motors are using in raw material transport, in exhaust gas handling, in glass forming, in annealing, in cutting and many more applications. Speed, torque and position are critical process parameters in obtaining quality products and should be controlled with high accuracy and reliability.

For speed and motion control, Eurotherm offers you the complete system including the motors; AC, DC or servo drives, and electrical cabinets. We offer you particular expertise in synchronising speed and torque in multiple motor applications such as top roll control in a tin bath, or squeezing roll and unwind control in the rolled wired glass process.

#### **Visual Supervisors**

The Eycon TM Series of visual supervisors provide the ideal plant floor interface for glass manufacturing. They provide innovative, multi-function control, recording and visualisation into a single process management unit. They are, in effect, a mini-DCS in their own right and can be utilized as a building block in a larger peer-to-peer solution - reducing engineering costs and increasing the availability of your system. Ideal for the glass batch house, furnace, forehearth and many other areas of your plant.

#### **Programmable Automation Controllers (PAC)**

The T2550 PAC is a high performance solution offering extremely cost effective redundancy options for your glass plant. Dual redundant processing is engineered into this product with a single press of a button. Combined with hot swap modules, auto I/O build functionality and world class control functionality, your return on investment couldn't be faster.

#### **Controllers**

Accuracy of control and reliability is important in many areas of the glass plant. Accurate control also reduces gas emissions to save both money and the environment. Our controller range brings you world-class control with an understanding of your application; helping you to make the best choices for your control requirements.

## **HISTOIRE DE L'ENTREPRISE**

Eurotherm, part of the Invensys group of companies, is a global supplier of automation and process control systems and products to the process and manufacturing industries, of which the Glass market represents a major part of its supply.

By combining automation and process control knowledge with world class specialist products, Eurotherm is able to offer an extensive range of the most cost effective Glass solutions. Eurotherm is committed to developing products and services specifically for the Glass industry to enable the continual reduction of costs, while maximising productivity.

Serving the diverse demands of glass applications

Eurotherm is recognised for its expertise in working with both end users and process equipment suppliers to produce advanced solution systems.

A successful history in supplying scalable automation solutions

## **MEETING LEGISLATION AND REGULATORY REQUIREMENTS**

We recognise the importance of legislation and accreditation in the Glass industry.

Our control systems are designed to facilitate regulatory compliance at all levels of the solution, by:

Comprehensive secure data management solutions that assist customers' needs for long-term traceable provenance of their products.

Eliminating guesswork and making more accurate and timely decisions to improve safety.

Providing tighter control to lower emissions and provide cleaner effluent.

Eurotherm is pleased to be involved with Glass industry original equipment suppliers and end user customers from across the world.

Some of our major customers include:

Kanthal – Philips Lighting - Tamglass - Owens Illinois - Draka Comteq Fibre - PPG - OSRAM - Corning - Owens Corning - Asahi - Vetrotex - Glaverbel - AGC Automotive - Bormioli - Seves - CNUD EFCO - FIC - BH-F - Pilkington - Schott - HORN - Nikolaus SORG - Swarovski - Riedel - Technoglas - Air Products - Air Liquide - Essilor - Hankuk Glass - Henry F. Teichmann - Johns

Manville - TG Huanan Glass - Changjiang Float Glass

## REPUTATION

Eurotherm has a reputation for delivering process control and automation solutions that provide you with measurable financial advantages of saving time, money and resources. These savings are achieved by providing solutions that can reduce energy costs and improve plant/process productivity, while enhancing the quality of products.

## WORLD-WIDE PRESENCE

Operating through Eurotherm companies, authorised agents and channel partners across the world guarantees you access to local expertise backed up by global specialists.

Regional systems engineering centers in strategic locations, operate advanced engineering methodologies to provide high quality, reliable systems solutions on time and within budget.

Above all, at Eurotherm we believe in understanding and solving your needs through personal contact and individual commitment. This blend of capabilities within our global organisation creates an unmatched opportunity of success for our customers.
